
Book Reading Analysis:

Understanding Generational
reading Habits & Preferences

23684 Rachel UWIMANA

Overview

Methodology

Data Collection and Preparation

- Survey data from Pew Research.
- Preprocessing: feature selection, renaming, handling coded & missing values

Predictive Model

Logistic Regression model trained to predict is frequent reader.

Innovation

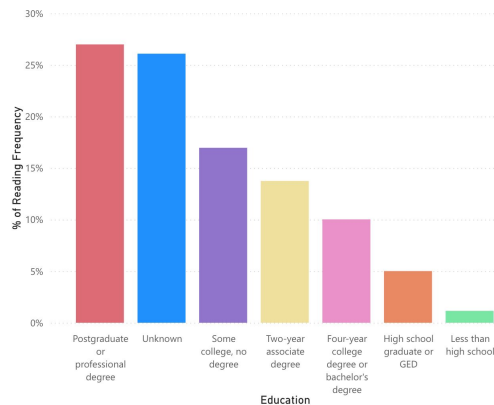

Interactive Ipywidget UI predicting reading frequency and providing personalized recommendations.

Key Results

Female read more than Male. Higher education correlates to most reading. Young people read less.

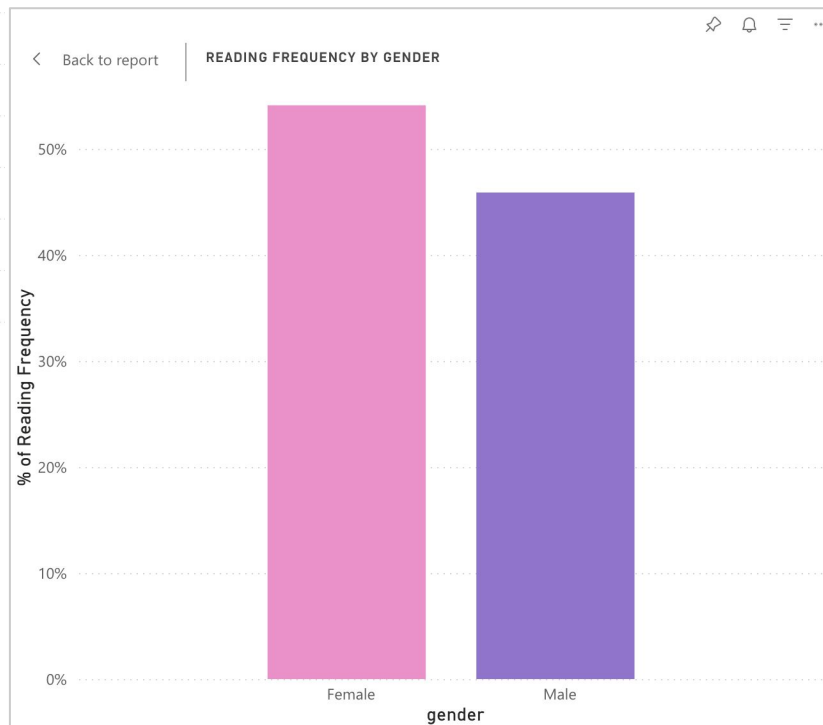

Results:

Demographics & Reading Frequency

Gender & Education

Female Show higher % of frequent readers than Male. Higher education correlates with increased reading frequency.

Generation

Baby Boomers and Gen X read more books annually. Decline in reading frequency in younger generations.

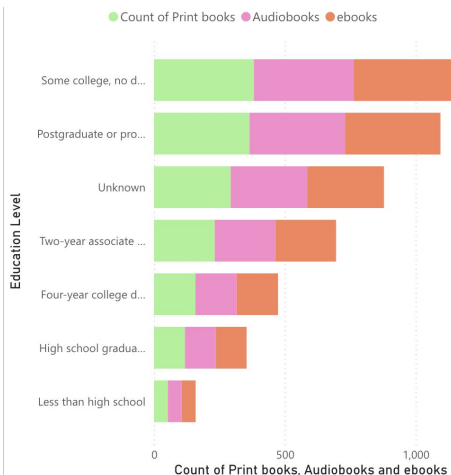

Results:

Device Ownership & Book Formats

Ebook Reader

eBook reader ownership correlates with frequent reading.

Male

Print books are most popular across education levels and Digital formats usage increases with higher education.

Smartphone

Smartphones show lowest correlation despite high ownership

Recommendations for future work

Strategic Marketing

Target online reader platforms and develop diverse content formats.

Model Enhancement

Explore advanced Machine learning models.

User Engagement

- Implement A/B testing.
- Gather user feedback for improvements.

Data Enhancement

Collect granular and advanced data and Investigate 'Unknown' education category

Rachel's Reading Recommendation App

Age: 26

Gender: ▼

Education: ▼

Reading Habits:

- ☒ Reads Print Books
- ☐ Reads Audiobooks
- ☒ Reads E-books

Device Ownership:

- ☒ Owns Smartphone
- ☐ Owns E-book Reader
- ☐ Owns Tablet
- ☒ Owns Laptop

Prediction & Recommendation

Prediction:My model predicts this person is **A frequent reader.**

Personalized Recommendation:

Based on our data, Females who own a ebook reader read an average of 27.07 books, compared to 13.44 for non-owners. We recommend you consider reading on a ebook reader to increase your reading!

This user interface incorporates the logistic regression model and allows a user to add their age, gender, education level and reading preferences.

Predicts whether someone is a frequent reader or not.

Provides a recommendation based on available insights.

Thank You,
For watching!
